

Pie chart illustrating the distribution of transcription factor families among the top 20 TF motifs. The chart shows the following categories and their counts:

Transcription Factor Family	Count
Homeodomains	22
zf-C2H2	13
HLH	10
Forkhead	6
bZIP	5
Doublesex_DM	2
HMGBbox_Sox	2
zfp-met	2
E2F	2
Zn2	2
RFX	1
MYF	1
RelB	1

A pie chart illustrating the distribution of transcription factor families. The chart is divided into four main categories: 'unknown' (276), 'Homeodomains' (1), 'GATA' (13), and 'Forkhead' (10). The 'unknown' category is the largest, represented by a light gray slice. The 'Homeodomains' category is a small olive green slice. The 'GATA' category is a light green slice. The 'Forkhead' category is a light blue slice. The remaining categories are represented by many very thin, multi-colored slices.

Transcription Factor Family	Count
unknown	276
Homeodomains	1
GATA	13
Forkhead	10
